Christopher Bradley (Brad) Ferguson

Saraland, AL · (251) 709-1552 · brad.ferguson@gmail.com · www.linkedin.com/in/cbferguson

Summary

Collaboration solutions architect with 20+ years designing, selling and delivering Cisco and Webex communications solutions for enterprise, education and wholesale customers. Pairs deep Webex Calling, CUCM and Webex Contact Center expertise with hands-on API, automation and AI integration skills, including MCP-based AI agents and AI receptionist scheduling workflows.

Trusted by sales, partner and customer teams to run technical discovery, build demos and proofs of concept, and turn business requirements into deployable solutions. Former adjunct instructor who explains complex technology clearly to technical and non-technical audiences.

Core Competencies

- **Pre-Sales & Partner:** Technical discovery · Solution design · Demos & proofs of concept · RFP responses · BoM/quoting (CCW) · Partner & wholesale enablement · Customer onboarding
- **Webex & Cisco UC:** Webex Calling · Webex Wholesale · Control Hub · CUCM · Unity Connection · CUBE / Local Gateway · Expressway · SIP/PSTN · Webex Devices & RoomOS macros
- **Contact Center & CX:** Webex Contact Center · Webex Connect · UCCX · IVR & call flow design · AI virtual agents · AI receptionist & self-service scheduling
- **AI, APIs & Automation:** Model Context Protocol (MCP) · REST APIs & webhooks · Webex APIs · Python · Ansible
- **Infrastructure:** Cisco routing & switching · Wireless · ASA/Firepower · Meraki · ISE

Experience

Collaboration Architect | C Spire Business | Aug 2023 – Present

Lead architect for enterprise and wholesale Webex environments, supporting sales, professional services and customers from discovery through deployment.

- Provide pre-sales architecture for Wholesale and Professional Services teams: discovery, solution design, technical validation, demos and implementation oversight.

- Administer Webex Wholesale partner environment spanning thousands of customer organizations; streamline repetitive admin work with API automation.
- Extended an open-source MCP server so AI assistants can run Webex Calling admin tasks (voicemail passcode reset/unlock, location, user and holiday schedule management) by customer org.
- Delivered an AI-powered virtual agent for a community college, using secure API calls for real-time data lookup, identity verification and database validation
- Designed and deployed Webex Contact Center solutions, from traditional IVR flows to AI-driven experiences built on Webex Connect.
- Architected CUCM-to-Webex Calling migrations with hybrid coexistence and phased cutovers, delivering deployments of 1,000+ endpoints.
- Designed CUBE Local Gateway architectures for SIP/PSTN connectivity, including call routing between Webex Calling and CUCM during migration.
- Built a custom Webex device macro experience for 39 retail locations statewide: branded customer-facing interface with one-touch specialist access.
- Engineered executive conference rooms to Cisco reference standards, including AV integration and API-driven lighting and shade control.
- Led CUCM, Unity Connection, Expressway and UCCX upgrades and implementations.

Senior Systems Engineer | C Spire Business | Aug 2018 – Aug 2023

Pre-sales and delivery engineer for multi-site enterprise clients across collaboration, networking and security.

- Designed and deployed CUCM, Unity Connection and UCCX for enterprise customers, laying groundwork for later Webex cloud migrations.
- Built Python, Ansible and API automation for deployment and upgrade workflows
- Created Bills of Materials in Cisco Commerce Workspace (CCW) to support accurate pricing and customer proposals.
- Implemented Cisco 9800 wireless, Catalyst/Nexus switching (EIGRP, OSPF, BGP), ASA/Firepower, Meraki full-stack, ISE and DNA Center.
- Led large network refresh projects, coordinating cross-functional teams, vendors and stakeholders to on-time, in-scope delivery.

Senior Systems Engineer | TekLinks (acquired by C Spire) | Jun 2006 – Jul 2018

Customer-facing engineer delivering Cisco voice, network and security solutions for regional enterprise clients.

- Deployed and supported Cisco Unified Communications Manager, Unity Connection and UCCX
- Delivered Cisco video endpoint deployments
- Implemented Cisco routing, switching, wireless and ASA firewall solutions for multi-site customers.

- Deployed Meraki full-stack (MX, MS, MR) for distributed retail and enterprise environments.
- Served as an escalation point for complex voice and network issues

Adjunct Instructor | Faulkner State Community College | Aug 2008 – May 2016

- Taught online Network Security, Windows Network Infrastructure Design and CCNA I–IV; built labs and coached students toward CCNA certification.

Earlier Experience

- Data Systems Engineer, Omni Engineering (2004–2006): Windows Server, Active Directory, Exchange and Cisco network support for SMB clients.
- Network Administrator I, University of Southern Mississippi (2003–2004): Managed campus wired and wireless network of 600+ access points; Tier 3 escalation.

Certifications

CCNP Collaboration · CCNP Enterprise · Cisco Webex Contact Center Expert · Cisco Webex Contact Center AI Expert · Cisco DevNet Associate (DEVASC) · Cisco DevNet Specialist · CCDA · CCNA · Certified Meraki Networking Associate (CMNA)

Education

B.S., Software Engineering Technology – University of Southern Mississippi

Computer Science – Faulkner State Community College - Phi Theta Kappa
